Going an important step beyond broad issue topics, each volume in the *At Issue* series offers a wide range of viewpoints that focus on a single controversial question.

A strategic mix of primary and secondary sources delivers a panoramic view of the selected issue, giving readers in secondary school and beyond an ideal resource to make informed decisions related to papers, projects and general information.

### Expert viewpoints

This acclaimed series provides in-depth discussions by leading advocates – professors, journalists, association executives, researchers and more – who support many differing views. As a result, the books not only offer a full spectrum of opinion on the issue, but also provide a roadmap to test the validity of the arguments by pointing to additional sources.

Extensive bibliographies and annotated lists of relevant organizations to contact offer a gateway to further research. This series provides a quick grounding in the issues, a challenge to critical thinking skills, and an excellent research tool in each inexpensive volume.

### What does *At Issue* bring to your collection?

All content in *At Issue* is unique to the series, with no overlap between other Greenhaven Press “Current Issues” series or titles.

Content includes primary and secondary sources such as speeches, government documents, periodical articles, book chapters, pamphlets and association publications. All viewpoints are no more than one year old, with the majority published within the past few months.
